                                  │ Users code  │
                                  │ searces textfile │
                                  └─────────────┘
                                         │
                                         ▼
                                   ◇ Does the number match? ◇
```

- Start
- Run() .exe file for VS program
- If WinActive() Send(Random(INT))
- Users code searces textfile
- Does the number match?
  - No → Windows Console ()"no valid number"
  - Yes → Windows Console ()"You won the lottery"
- Send("keystroke")
- WinKill("ConsoleWindow")
- MsgBox "Test Complete "

This script tests a program that takes a 5 digit number from the user, then searches a file to check for matches
